Muriate of Potash (MoP)

SPECIFICATION:

- Product Description Contains 60% Potash (K). By far the most widely used K fertilizer.
- Available in white and reddish crystalline form.
- Details Features & Benefits Readily dissolves in water on application to soil, it ionizes to dissociate into K & Cl ions.
- K gets attached or adsorbed on the soil complex. As such, though MOP is readily soluble in water, it is not leached.
- High concentration of nutrients makes packing, storage and transport costs per unit cost of nutrient very low.
- Suitable for all crops both for basal application & top dressing Essential for all crops for healthy growth and better yields.

Technical Details Moisture % by weight (Maximum) - 0.5 % Water soluble Potash (as K₂O) per cent by weight (Minimum) - 60% Sodium as NaCl percent by weight (on dry basis) Maximum - 3.5 % Packing - 50 Kg HDPE Bag.
